Summary

I am a final-year student at Government College of Engineering, Aurangabad with a passion for Web Development and UI/UX design. I am a dedicated open-source contributor with active participation in events like HacktoberFest. I am also an efficient problem solver with decent rating on competitive platforms. I am proficient in creating user-centric experiences and enthusiastic about leveraging technology to solve real-world problems and eager to contribute innovative ideas and technical expertise.

Education

Government College of Engineering, Aurangabad (Chh. Sambhaji Nagar)

Jun 2020 – Jun 2024

Bachelor of Technology in Information Technology

Aurangabad, Maharashtra

Experience

Government College Of Pharmacy

Jun 2023 – July 2023

Web Development Intern

Aurangabad, Maharashtra

- Maintained a medical follow-up software called "Neocare" which involved bug tracking and code revamping.
- Experienced working on real-life projects and their codebase functionalities.
- Coordinated with team members and mentors in order to achieve the optimal result possible.

CodeClause

April 2023 – May 2023

Front End Developer Intern

- Developed task based frontend projects using HTML, CSS, Javascript.
- Explored frontend technologies in depth in order to build various projects and expanding my skillset.

Projects

Netflix Clone | *ReactJs, NodeJs, Tailwind CSS, Firebase*

Link

- Developed a Netflix Clone using ReactJs as frontend and implemented a visually appealing and responsive user interface ensuring seamless user experience across various devices and screen sizes.
- Implemented authentication using Firebase enabling users to create and log in to their accounts, and manage their profiles.
- Integrated API to fetch real-time movies data and showcase to the user according to their interests.

Crypto-Hunt | *ReactJs, NodeJs, Tailwind CSS, ChartJs*

Link

- Designed and developed a dynamic and responsive cryptocurrency tracker application, allowing users to monitor real-time prices, market capitalization, and trading volumes of various cryptocurrencies.
- Integrated APIs to fetch real-time market data, ensuring accuracy and reliability in price tracking and analysis.
- Integrated ChartJs for dynamic and interactive data visualization, presenting complex market data through visually appealing charts and filtering properties.

Personal Portfolio | *HTML, CSS, Javascript*

Link

- Created a professional and responsive portfolio website allowing seamless navigation and accessible across devices.
- Designed interactive sections to showcase personal projects, technical skills, and achievements.
- Incorporated contact forms for easy communication and integrated social media links, enabling visitors to connect directly.

Technical Skills

ReactJs, HTML, CSS, Javascript ES6, NodeJs, Typescript, NextJs, Tailwind CSS, Material UI, Gsap, C++, Data Structures and Algorithms, SQL, UI/UX design, Wireframing, Prototyping, Visual Studio Code, Git, Github, Figma, Spline 3D

Achievements

- Co-founded 'HackSlash', a coding club and played a pivotal role in establishing and leading a team of creative designers for successful execution of various club projects.
- Designed and developed website for technical event called 'Wings'. (**Link**)
- Established unique and modern designs and helped in developing website for the writer's club of college, 'Catalyst'. (**Link**)
- Contributed in open-source projects in HacktoberFest'23, earning digital badges.
